## Part 1. Automation

### WHAT IS AUTOMATION?

**IBKR video guide:**

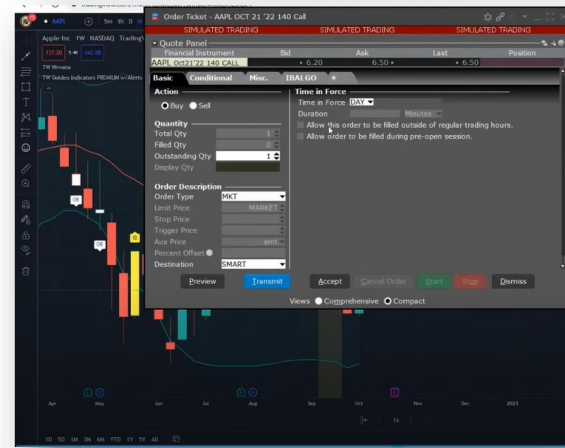

<https://www.youtube.com/watch?v=ObNuRyXvGJO>

Orders are inputted into the broker the night before with an entry, stop loss and target

Focusing on two levels:

- ◆ One Long Level where I am bullish
- ◆ One Short Level where I am bearish

Throughout the day the broker will fill open orders and it will either hit the stop loss or target

### WHEN TO USE THE STRATEGY?

I love using this strategy when price action is consolidating and the ranges are getting tighter

The goal is to catch a big move after two or more days of going sideways. I call this the Big Box Small Box

I post FREE picks that fit my strategy every single day on both YouTube and Twitter so please subscribe so you do not miss out:

## WHAT INSTRUMENTS CAN BE USED?

### FUTURES

- \*You can enter futures trades overnight as triggers can fill after hours (margin required)
- \*You can bracket futures orders with an entry stop and target
- \*Trade both during regular trading hours (RTH) and overnight
- \*Enter trades at any time and is great for those who live in other time zones that cannot trade the New York Open

### SHARES

- \*Cash account or margin
- \*I use bracket orders with an entry, stop and target here is an example with \$BABA:

<https://youtu.be/0BKuE4iha6E>

### OPTIONS

- \*Cash account or margin
- \*Options can be entered using “conditional orders” .

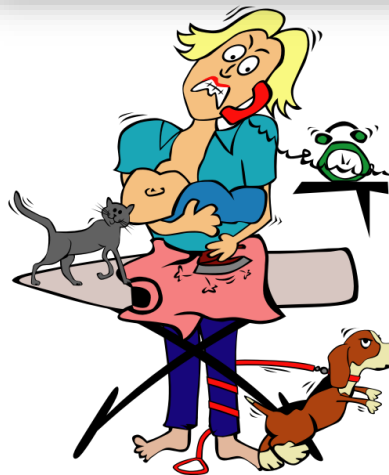

See video guide here:

## WHY DO I TRADE WITH AUTOMATION?

- \*Removes the human emotion out of trading and allows me to trade a variety of setups
- \*Saves time by inputting the orders in the night before when the market is closed
- \*Removes human error by allowing the broker to do the work
- \*Great for beginners who feel that the charts are moving fast
- \*Critical for those who can't stare at the charts all day i.e., busy schedules, working 9 to 5

## Automated Trigger Example: Monday, April 24th, 2023 \$MU Profit \$2,883 (SHORT)

- \*FREE trigger setup posted on YouTube and Twitter daily so please make sure to subscribe
- \*\$MU was filled short within the first hour and the trade was closed by 1pm to secure profits
- \*I used shares to bracket my entry, stop and target to keep the trade automated
- \*Using STOP Limit Orders to ensure we are only filled on the trade when price is TOUCHED
